EDUCATION

University of Waterloo

Sep 2025 – Present

Bachelor of Honours Mathematics and Business Administration (Co-op)

Waterloo, ON

- **Awards:** Waterloo President's Scholarship; Term Distinction; Excellent Academic Standing
- **Relevant Coursework:** Financial and Managerial Accounting, Business Law, Microeconomics, Macroeconomics, Business Entrepreneurship, Interpersonal Communication

EXPERIENCE

Business Advisory Intern

April 2026 – July 2026

KPMG

- Trained in financial modeling, valuation, and three-statement projection within the Deal Advisory practice, building two feasibility models end to end: a **10-year** coffee shop DCF built to a **16.38% WACC** derived from cost of equity and after-tax cost of debt and stress-tested at $\pm 5\%$, and a **12-year four-city** restaurant rollout with independent escalators for revenue, costs, capital expenditure, and salaries.
- Contributed to an independent valuation of **Nishat Sutas Dairy Limited**, a Pakistan-Turkey dairy joint venture backed by **CAD 19.5M** from one partner alone, performed for both shareholders to support the transfer of a **49.10%** stake, building Excel models to estimate fair value and inform negotiation.
- Developed research memos and client-ready presentations translating financial analysis into clear deal narratives, supporting senior advisors across engagements spanning energy, infrastructure, and dairy.

Business Analyst Intern

Sept 2024 – Jan 2025

Kinetic Worldwide, Out-of-Home Media and Digital Planning

- Selected as **one of two interns** for a rotational program spanning client servicing, planning, execution, finance, and IT, building an end-to-end view of how an agency turns a client brief into delivered inventory and revenue.
- Tracked and reconciled over **CAD 1M+** in media spend across **three national campaigns** for two blue-chip clients, planning against **12,000+ outdoor sites** in **Katalyst**, Kinetic's proprietary and industry-first platform.
- Rebuilt Excel dashboards daily from tracking-team data covering reach, impressions, and return on ad spend, and assisted the finance team with invoicing and cash flow tracking in Odoo.

Fundraising Research Intern

June 2024 – Aug 2024

Justdiggit

- Owned funder research end to end for the **Kijani regreening app**, building a screen that scored corporate and philanthropic prospects on mission fit and giving capacity.
- Produced the priority outreach list the fundraising team worked from, separating funders with the **capacity** to give from those with the **mandate** to.
- Wrote the research briefs behind each shortlisted prospect, turning giving histories and stated mandates into a case for backing African landscape restoration.

RESEARCH & PROJECTS

Smog-Eating Billboard

Research, Cost-Benefit Analysis, Technical Writing

- Researched photocatalytic titanium dioxide (TiO_2) and modeled the air-quality impact of retrofitting Lahore's **1,150+ advertising hoardings**, estimating pollutant removal equal to **292,800 trees** in six hours.
- Published the analysis in *Daily Pakistan*, a national newspaper, arguing the case to advertisers on cost-benefit grounds: smog-driven discoloration makes conventional billboard upkeep costlier over time.

BarakahLink

Python, Google Gemini API, Leaflet Maps, TypeScript

- Built an AI-powered donation-redistribution platform using Google Gemini to convert unstructured donation inputs into organized listings and dignified need summaries.
- Engineered SMS-style access (simulated gateway) and hyper-local mapping to serve low-connectivity users, prioritizing accessibility for underserved communities.

TECHNICAL SKILLS

Finance & Valuation: Financial Modeling, Three-Statement Projection, Discounted Cash Flow, Cost of Capital (WACC), Sensitivity & Scenario Analysis, Fair Value Estimation, Cost-Benefit Analysis

Accounting: Journal Entries, Financial Reporting, Cash Flow Tracking, Invoicing, Odoo (ERP)

Data & Tools: Excel (Modeling, Dashboards, Pivot Tables), Python, SQL, pandas, PowerPoint

AI & Automation: Prompt Engineering, LLM API Integration (Gemini, OpenAI), AI-Assisted Research and Drafting, Workflow Automation (n8n), Cursor, GitHub Copilot, Claude, ChatGPT

Professional: Research Memos, Client-Ready Presentations, Market Analysis, Funder and Prospect Research

LEADERSHIP & ACTIVITIES

Water Polo Captain | Computer Science Society | Entrepreneurial Society, University of Waterloo
